BASIX

AV-controlling, solid and powerful

Survey

BASIX is the ideal multifunctional AV-controller for two projectors. The aim is easy operating and a good price without loss of high technology. BASIX enables realtime programming through the IR-remote control and functions also the connection between a PC and projectors. The status of the projectors can be monitored on the LED-display. Furthermore there is an MIDI-interface which makes it possible to control the projectors through a MIDI-sequencer or MIDI-software.

With BASIX you can use projectors in multimedial setups for a reasonable price.
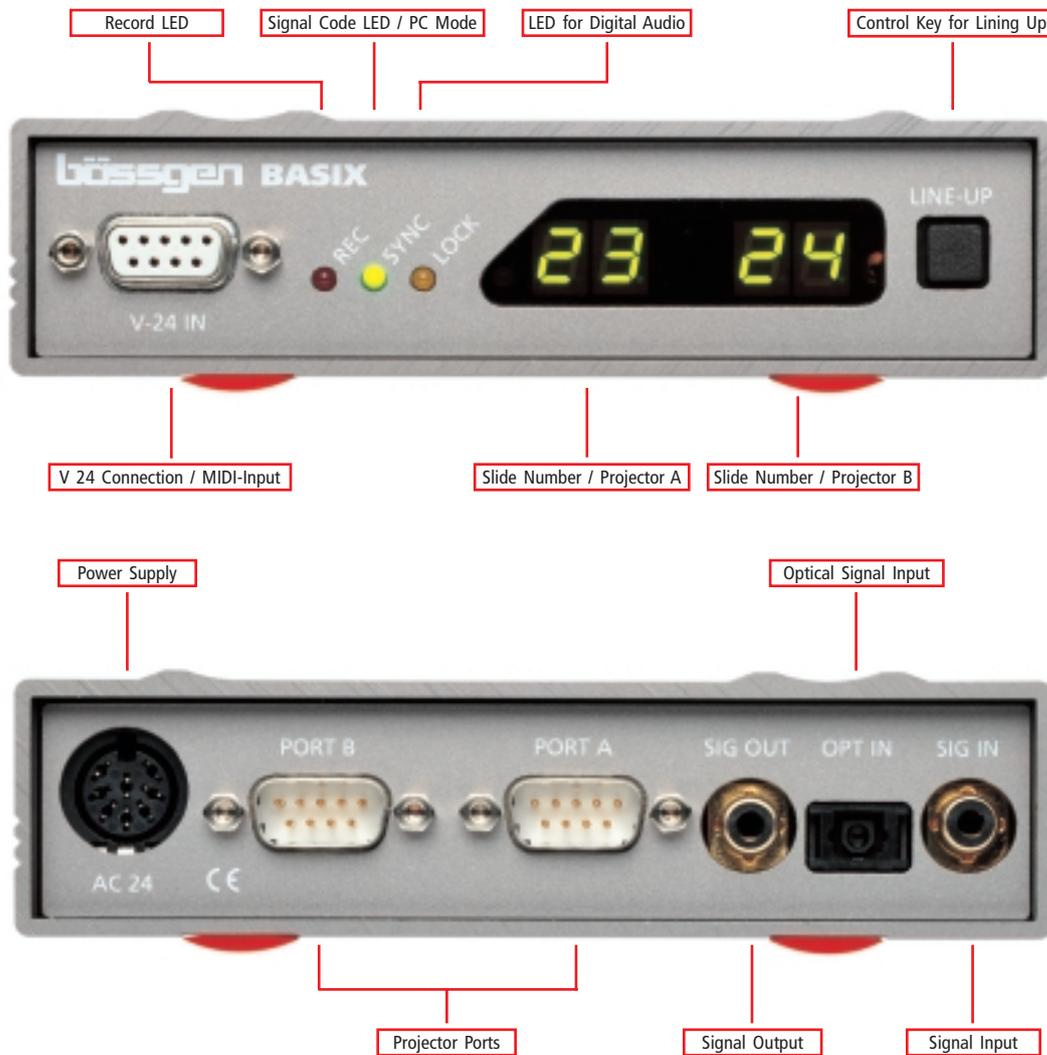

Open design
For many years now our devices are software updatable. The actual unit is updated easily and efficiently - done at your own PC.
The newest version is always available on our internet-pages. Future technology is released now ... by BASIX.

The versions
BASIX is available in a „basic" version at an unusual low price for newcomers. BASIX „advanced" is aimed to an experienced user. An extension may aquired at any time. The PC-software IMAGIX, digital recording on CD and timecode synchronization are also available with

| Record LED | Signal Code LED / PC Mode | LED for Digital Audio | Control Key for Lining Up |

| V 24 Connection / MIDI-Input | Slide Number / Projector A | Slide Number / Projector B |

| Power Supply | Optical Signal Input |

| Projector Ports | Signal Output | Signal Input |

BASIX advanced. BASIX extends with your increasing demands! BASIX advanced reads „our" signals FreeTrac, PlusTrac and Dataton Syncode. Moreover, it reads those signals equally well whether coming from analog tape or having been encoded into digital audio. The basic version reads only analog PlusTrac.

Connections
Connecting cables are available for different types of projectors. BASIX is powered through the connected projectors. For Kodak and Leica projectors with a round slide tray and PCOM interface a AC-24 adapter is needed.

Infrared remote control
Important functions of BASIX can be remotely controlled. It controls focusing of Ektapro and Leica RT projectors. Here BASIX passes the command on to the active projector.
